## Heidelberg with a solid start to the new financial year - order backlog growing thanks to subscription model

Heidelberg (ots) -

- Incoming orders in the first quarter up by 6 percent to EUR665 million
- Group sales increased by 9 percent to EUR541 million
- Operating result (EBITDA) up from EUR14 million to EUR20 million - EBIT positive at EUR2 million
- On course to achieve overall annual targets for 2018/2019
- Digital transformation well underway, medium-term targets firmly in sight

Heidelberger Druckmaschinen AG (Heidelberg) has started off the 2018/2019 financial year with growth in net sales and result. High demand for the newly established subscription model and the launch of series production of the Primefire digital press are demonstrating the potential the digital transformation offers the company. Incoming orders, for example, improved in the first quarter (April 1 to June 30) by 6 percent to EUR665 million. Furthermore, the previous year's figure of EUR629 million benefited from the Print China trade show. The order backlog grew by 18 percent to EUR714 million (previous year: EUR603 million), partly due to subscription contracts, particularly in terms of life cycle business, i.e. services and consumables.

The first quarter brought in the first revenues raised from subscription contracts, which generate recurrent sales over a term that usually lasts five years. However, Heidelberg also recorded growth in traditional business during the first quarter, with sales rising by 9 percent in total to EUR541 million, despite negative currency effects. Had exchange rates remained similar, revenues would have risen by around 11 percent.

"The strong customer demand for our new subscription portfolio and digital packaging printing presses has exceeded our expectations. Heidelberg is driving digitization in the entire industry. The establishment of the new business models is proceeding to plan and will at first make a relatively modest contribution to net sales and result, albeit one that will increase significantly in the medium term," commented Rainer Hundsdörfer, CEO of Heidelberg.

Operating profit at the start of the year

At EUR20 million, EBITDA excluding the restructuring result was higher than the same quarter of the previous year (EUR14 million), bringing the EBITDA margin up from 2.8 percent to 3.7 percent. Despite the additional staff costs associated with the new collective wage agreement, EBIT excluding the restructuring result was positive in this quarter, which traditionally records the weakest sales, at EUR2 million (previous year: EUR-3 million). As previously announced, the company is continuing to work on reducing financing costs to less than EUR20 million in the medium term. As part of this process, a partial repayment of the existing corporate bond in the amount of EUR55 million was effected in mid-July. The associated non-recurring transaction and early redemption fees reduced the financial result in the quarter under review from EUR-13 million to EUR-16 million, although lower future interest payments will have a noticeable beneficial impact. After factoring in income taxes, the net result after taxes at EUR-15 million was slightly better than in the previous year (EUR-16 million).

At EUR3 million, operating cash flow was on a par with the same quarter in the previous year (EUR1 million). Free cash flow of EUR-45 million in the quarter under review (previous year: EUR-13 million) can be attributed to a build-up in inventories due to the growing order backlog, investments in building the innovation center at the Wiesloch-Walldorf site and a non-recurring increase in leasing payments for buildings. At EUR332 million, equity was at the same level as on the annual reporting date of March 31, 2018. The equity ratio was unchanged at around 15 percent. Despite the higher net financial debt, which is typical for the season and amounted to EUR278 million on June 30, 2018 (previous year: EUR234 million), leverage was 1.4, meaning it is still well below the target value of 2.

"Our financing structure is very solid. We have low leverage and are maintaining liquidity reserves we can use to finance our planned investments in new business models and the company's digital transformation," said Heidelberg CFO Dirk Kaliebe.

Outlook unchanged: Moderate growth in sales and net profit after taxes anticipated for 2018/2019 financial year

Given the good start to the year, Heidelberg is confirming its overall targets for 2018/2019. Consequently, it is still forecasting a moderate growth in sales. Due to this, and thanks to continued efficiency improvements, the EBITDA margin excluding the restructuring result is likely to lie in the range of 7 to 7.5 percent, despite higher collectively agreed wages. Restructuring costs should be in the region of EUR20 million. The non-recurring expenditure associated with the partial repayment of the corporate

bond is having a detrimental impact on the financial result. Due to this, and in view of rising tax expenditure among foreign group subsidiaries, a moderate overall increase in the net result after taxes compared to the previous year (including the non-recurring tax effect for 2017/2018) is being forecast.

Subscription model to play an ever-greater part in increasing net sales and result

The strong demand for the new subscription model is undiminished and has produced additional contracts in the quarter under review. Numerous contracts are also in the pipeline at present. Given the high level of interest international customers are showing in the pay-per-use model that Heidelberg alone offers in the sector, the target of a good 30 contracts for the current financial year is seen as very realistic. This is equivalent to potential sales of approximately EUR150 million over the contract period. The aim is to conclude at least 250 contracts by 2022.

On the whole, Heidelberg is on course to achieve its targets for 2018/2019, although these new business achievements will have a limited impact as they are still in their early stages. This strong demand validates the Management Board's medium-term targets for the period leading up to 2022, which are to see Group sales increase by EUR500 million to around EUR3 billion, EBITDA go up to EUR250 - 300 million and net profit after taxes rise to at least EUR100 million.
