PAKi Logistics continues international growth and opens new location in Poland

Warsaw (ots) -

Last week on Wednesday June 21st, 2023, the biggest European *Open Pooling* service provider PAKi Logistics headquartered in Germany opens its fifth international location in Warsaw. From there retailers, manufacturers and transport companies will now optimally be supported in the handling of their specific load carrier requirements for standardized exchangeable pallets and boxes in the Eastern European region.

PAKi Logistics opens new office in Poland.

At the beginning, PAKi uses its own office within coworking service offered by Spaces/Regus in a prestigious Platinum Business Center. This secures optimal space flexibility in the expected growth. Initially, the office in Poland will host group of several PAKi team members from Customer Service, Logistics Service, Field Service & Sales, which is expected to be doubled by the end of 2023 and further expanded in next years to secure highest service quality to its CEE customers.

"A great milestone of our growing Europe-wide network and our decades of experience, which brings benefits to our customers. With our new location in Warsaw like earlier this year in Eindhoven (NL) & Essen (DE), we want to provide our customers from industry, retail, and logistics optimal support, not only in their mother language, but especially through the geographical proximity that has now been created," explains Dariusz Wiśniewski, Director Sales - Northern Europe/Benelux/Central & Eastern Europe/Italy of PAKi Logistics.

PAKi Logistics continues to grow internationally.

PAKi Logistics is thus consistently continuing the expansion that began in 2019 with the opening of the first European branch office in Toulouse, France. After the important French-Iberian market, where almost 25 employees in France now organize pallet pooling for French, Spanish and Portuguese customers, another office followed in Eindhoven, the Netherlands, and in the metropolis of Essen at the beginning of 2023. A further expansion will be in Italy in the second half of 2023.

In the last few years, PAKi Logistics has transformed from a German provider of open-pool load carrier management operating across Europe to a European provider with its headquarters in Germany. "It is very important to us to be where our customers are. We want to offer our customers the best possible service in the field of sustainable load carrier management in open pools. And that includes customer proximity," explains Marc Groenewoud, CEO of PAKi Logistics. With this strategic step, PAKi Logistics is strengthening its Europe-wide network of more than 10,000 partners. "In addition, we are continuously expanding our market by offering our services not only across countries, but also across continents," Marc Groenewoud points out. "In this way, we are creating the infrastructure for further international growth for our customers as well".

About PAKi Logistics

PAKi Logistics is THE open pooling service provider for the management of standardized exchange pallets and boxes. We help traders, manufacturers, and transport companies throughout Europe to manage their specific load carrier needs. With our experience and know-how, we offer sustainability, reliability, and efficiency in load carrier management.

The aspect of reusability of load carriers plays a major role for us and helps both our customers and us to improve the CO2 footprint in the supply chains. By implementing digitalization in all business areas, we help our customers save resources and time so they can focus on their core business.
