## Introducing DNO Control: Ensuring Compliance for Charge Point Operators in Germany

Munich, Germany (ots) -

We are excited to announce the launch of our latest technological innovation, the "DNO Control" feature, designed specifically to support Charge Point Operators (CPOs) in achieving regulatory compliance in Germany.

Our DNO Control solution addresses the critical need for regulatory adherence in the rapidly evolving electric vehicle (EV) charging industry. This feature ensures compliance with the VDE-AR-N 4100 regulations and §14a of the German Energy Industry Act (EnWG), enabling seamless operation and integration of charging infrastructure.

Key Highlights of DNO Control:

- Regulatory Compliance: DNO Control ensures that all EV charging stations comply with Germany's stringent regulations, providing CPOs with peace of mind and operational efficiency.
- Advanced Technological Integration: Featuring interfaces for digital inputs, current loop output, and MQTT modules, our solution supports a wide range of control and monitoring applications.
- Geographic Relevance: While the initial rollout focuses on Germany, DNO Control is also applicable in other European countries with similar regulatory frameworks, including Austria, Switzerland, and Denmark.
- Industry Collaboration: Developed in collaboration with local German customers, this technology showcases our commitment to delivering state-of-the-art solutions that meet current market demands.

"DNO Control represents a significant milestone in our journey to empower CPOs with tools that simplify regulatory compliance and enhance operational capabilities," said Max Brandt, CEO of FLEXECHARGE. "This feature not only addresses current needs in Germany but also positions us to support broader European compliance requirements."

Join us at the Power2Drive trade show in Munich to learn more about how DNO Control can revolutionize your EV charging operations. For more information or to schedule a demo, do not hesitate to reach out to our Media contact.

About FLEXECHARGE:

FLEXeCHARGE was founded in 2019 by Robert Brehm, who had spent over 10 years researching energy management as part of his PhD, and Jan Köster, a seasoned sales professional within the technology industry. CEO Max Brandt subsequently joined the company, providing a solid background in entrepreneurship and previous industry experience with the BMW Group. The energy

tech company, whose headquarters is in Copenhagen, is on a mission to transform sustainable mobility by seamlessly integrating EV charging with the grid. FLEXECHARGE aims to create a smarter, greener transportation ecosystem that benefits all. For more information, visit: <https://www.flexecharge.com/>
