ELAT Solar, renowned for its commitment to sustainable energy, is taking a fresh and innovative approach to solar panels

Hasselt, Belgium (ots,) -

Moving away from traditional images of solar panels on roofs accompanied by technical explanations, ELAT Solar presents the lively ELAT Solar buddies: Oriana and Solaris. These characters are designed to guide consumers through the world of solar energy in a fun and informative way. They simplify complex technology and highlight the benefits of switching to green energy.

Exciting news from Solaris and Oriana

The duo is also introducing a new IBC solar panel to the ELAT Solar family. This panel aligns perfectly with ELAT's mission to offer reliable and innovative energy solutions in an accessible manner. More importantly, with this product expansion, they can better serve both consumers and installers. This is the first panel in ELAT Solar's new "Cosmic" series.

In addition to the "Cosmic" series, ELAT Solar offers the "Lumis" series, which celebrates the balance between aesthetics and functionality. This series includes their current TOPCon panels, known for their superior efficiency and sleek, all-black appearance.

About ELAT Solar

With this product launch and their innovative approach to solar panels, ELAT Solar is setting new standards in the industry. Solar energy has never been so understandable! Visit www.elat.com to learn more about the products and follow Oriana and Solaris on their adventures in the world of solar energy.

Want to meet Solaris and Oriana? You can meet them at InterSolar in Munich from June 19 to 21.
